# C\_TBIT44\_731 Practice Test

ERPPrep.com's C\_TBIT44\_731 PDF is a comprehensive compilation of questions and answers that have been developed by our team of SAP PI experts and experienced professionals. To prepare for the actual exam, all you need is to study the content of this exam questions. You can identify the weak area with our premium C\_TBIT44\_731 practice exams and help you to provide more focus on each syllabus topic covered. This method will help you to boost your confidence to pass the SAP PI certification with a better score.

## C\_TBIT44\_731 Questions and Answers Set

### Question 1.

Which Web-services-related protocol is supported by SAP Net Weaver PI 7.31?

Note: Please choose the correct answer.

- a) Web Services Description Language (WSDL)
- b) WS-Reliable Messaging (WS-RM)
- c) Representational state transfer (REST)
- d) Open Data Protocol (OData)

**Answer: b**

### Question 2.

Which types of acknowledgment are available for asynchronous communication in Process Integration?

Note: There are 2 correct answers to this question.

- a) System Acknowledgment
- b) ABAP Acknowledgment
- c) Application Acknowledgment
- d) HTTP Acknowledgment
- e) Java Acknowledgment

**Answer: a, c**

### Question 3.

You are not using Integration Engine processing in your system. You are troubleshooting configuration errors with the Advanced Adapter Engine (AAE) as messages are not reaching the target system. What is a typical sequence of checks that needs to be performed?

Note: Please choose the correct answer.

- a) Receiver Determination → Interface Determination → Mapping → Technical Routing → Call Adapter
- b) Routing → Mapping Runtime → Connectivity
- c) Connectivity → Routing → Mapping Runtime
- d) Mapping runtime → Routing → Connectivity

**Answer: b**

Question 4.

While monitoring the customer's production system you notice that there are many messages in the Advanced Adapter Engine with the status HOLD. Why do the messages have this status?

Note: Please choose the correct answer.

- a) The receiver system is currently down for maintenance. Once the receiver system is back the messages will be delivered.
- b) The messages are Exactly Once in Order (EOIO) quality of service and the first message in the queue has not yet been delivered successfully.
- c) The messages are being sent using a communication channel that has been configured in the Availability Time Planning tool in the Runtime Workbench
- d) The messages are using event-driven message processing and will be sent when the necessary event is triggered.

**Answer: b**

Question 5.

Which of the following pipeline steps belong to logical routing?

Note: There are 2 correct answers to this question.

- a) Interface Determination
- b) Call Adapter
- c) Receiver Determination
- d) Message Split According to Receiver List

---

e) Request Message Mapping

**Answer: a, c**

Question 6.

The Advanced Adapter Engine is installed as a component on the Integration Server. When would you install the non-central Advanced Adapter Engine?

Note: Please choose the correct answer.

- a) When a firewall between the business system and the Integration Server prevents them from communicating directly
- b) When the business department requires Knowledge Management on a separate system
- c) When you want to use cross-component business process management (ccBPM) in the Advanced Adapter Engine
- d) When you want to use the advanced monitoring capabilities of the Integration Engine

**Answer: a**

Question 7.

How can you describe a provider proxy?

Note: Please choose the correct answer.

- a) A provider proxy is a Java class used in the Advanced Adapter Engine.
- b) A provider proxy is a language-specific implementation of an outbound service interface.
- c) A provider proxy is a language-specific implementation of an inbound service interface.
- d) A provider proxy is an ABAP program used in ALE distribution.

**Answer: c**

Question 8.

Which conversion parameters are available in the SOAP adapter?

Note: There are 2 correct answers to this question.

- a) Keep Headers
- b) Do Not Use SOAP Envelope
- c) Sync/Async Bridge

---

d) File Content Conversion

**Answer: a, b**

Question 9.

SAP Net Weaver provides the Enterprise Services Repository Content (ESR Content). What is one of the advantages of using ESR Content?

Note: Please choose the correct answer.

- a) Additional configuration options for the Advanced Adapter Engine Extended
- b) Extended monitoring capabilities based on predefined business objects
- c) Fast implementation based on pre-configured content that supports industry standards
- d) High user acceptance based on standard compliant user interfaces

**Answer: c**

Question 10.

You are working on a dual-stack system and want to configure an integration scenario with one sender and two receivers. Each receiver uses two different service interfaces. The WS adapter is used for each receiver. The sender provides an IDoc from an ABAP system. How many sender agreements do you have to configure?

Note: Please choose the correct answer.

- a) 0
- b) 1
- c) 3
- d) 2

**Answer: a**

## Full Online Practice of C\_TBIT44\_731 Certification

ERPPREP.COM presents authentic, genuine and valid practice exams for SAP PICertification, which is similar to actual exam. We promise 100% success in very first attempt. We recommend going ahead with our online practice exams to perform outstandingly in the actual exam. We suggest to identify your weak area from our premium practice exams and give more focus by doing practice with SAP system. You can continue this cycle till you achieve 100% with our practice exams. Our technique helps you to score better in the final C\_TBIT44\_731 exam.
